

Tilting circular saw

Wisa M55 and W-Max M60

The types Wisa M 55 and W-Max M60 are user-friendly and secure solutions for working with wood in agriculture and forestry.

They are very easy to use and have a clear and simple handling. These types of saws can be used in any weather due to their fully galvanised all-steel design.

The saws are equipped with a wheel set and two continuously adjustable tilt extensions as standard.

Such tilt extensions can be used as a measure of wood length as well as a chassis handle.

This design models are characterized by their enormous cutting depth.

A secure solution for working with wood in agriculture and forestry!
